Christopher Columbus was born in **1451 in Italy**. His father was a wool merchant. He was born into a time period called the **Renaissance**. Lots of people were building new ships to explore different parts of the world. Columbus's first trip on the sea was when he was **13 years old**.

## What did Christopher Columbus do?

To follow his dream, Christopher Columbus need money, so the King and Queen of Spain gave him money to buy ships. He set sail on 3<sup>rd</sup> August 1492 with three ships.

### Life on the Ships

The men had no cabins to sleep in, so everyone had to sleep on deck. The ships let water in all the time, and the men had to work pumps to keep the ships afloat!

They were on a voyage into the unknown, they did not know where they would land.

How would you feel about this?

- Christopher Columbus used a compass to help him find his way.
- The trip took them longer than expected and they got a bit scared.
- They could find no land, all they could see was ocean.
- They were running out of food and water.
- After 36 days, one man spotted an island, it was in the Bahamas.

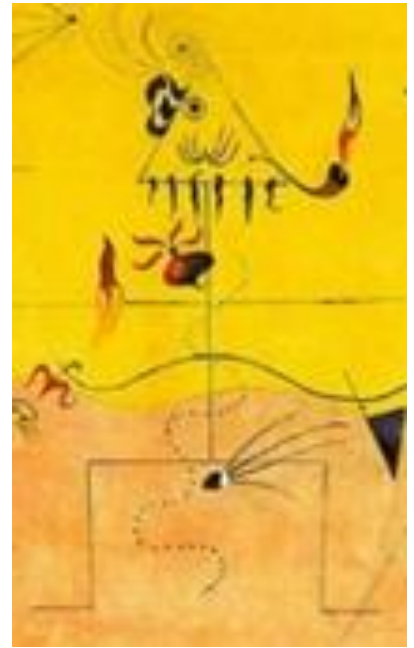

## What happened to Christopher Columbus?

- Christopher Columbus sailed to America in 1502 for the fourth time, still hoping he would get to China.
- Instead, he ended up in Central America.
- His ships had holes in them so he had to wait a whole year to sail home.
- When he got home he was very ill and he died in 1506.
