Week 9, Day 5 **Pictograms**

Each day covers one maths topic. It should take you about 1 hour or just a little more.

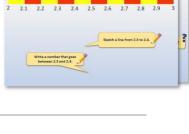

Start by reading through the Learning Reminders. 1. They come from our *PowerPoint* slides.

Tackle the questions on the **Practice Sheet**. 2. There might be a choice of either Mild (easier) or Hot (harder)! Check the answers.

Finding it tricky? That's OK... have a go with a 3. grown-up at A Bit Stuck?

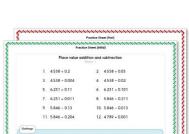

Have I mastered the topic? A few questions to 4. Check your understanding. Fold the page to hide the answers!

	tify the value of the '4' in the following numbers:
(a)	3.407
(b)	4.821
(c)	0.043
(d)	5.104
(e)	48,739
How	many times must Dan multiply 0.048 by 10 to get 48,000?

Practice Sheet for All Make a pictogram

Use the following information to create a pictogram. Remember to include labels and a title.

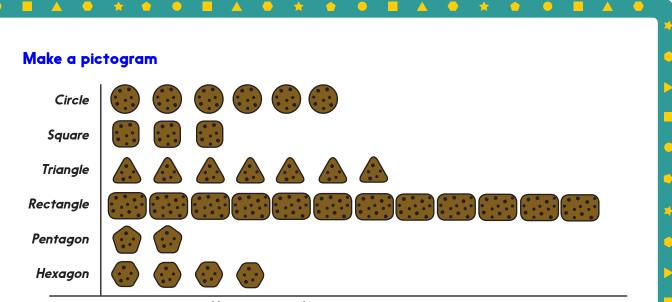

Cookie shape	Number of cookies
Circle	HHT I
Square	
Triangle	HH11
Rectangle	HHT HHT
Pentagon	
Hexagon	

Challenge

Hot: Have a go at this challenge!

Can you use the pictogram to make up and answer 3 questions about the cookie shapes?

A Bit Stuck? Smiley sums

Work in pairs

Things you will need:

- Two dice with numbers 1 to 5 and a star on 6
- A pencil
- A pictogram to fill in

What to do:

- Roll the two dice. If you get a star, roll again.
- Put the larger number first.
- Count on the smaller number to add the two numbers.
- Look at the pictogram. Find your answer in the bottom row.
- Draw a smiley face above the answer.
 If there is already a smiley face there,
 draw another smiley face above the first one.

U	
0	
0	5+3=8
0	
\bigcirc	
\bigcirc	
0	

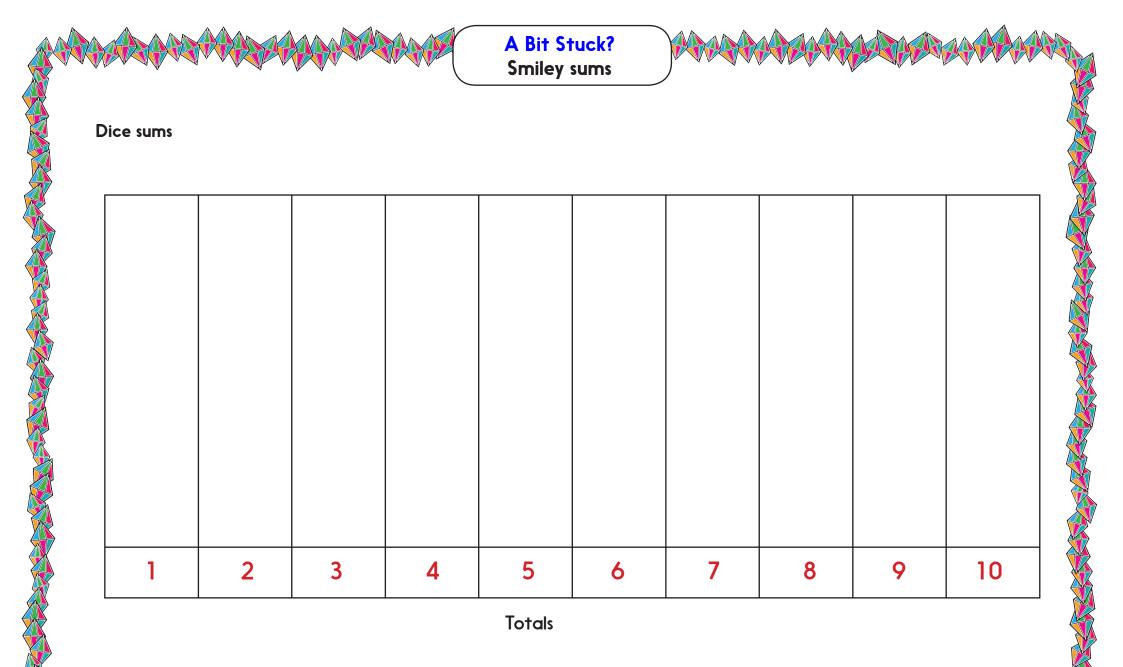

S-t-r-e-t-c-h:

Which total do you think will come up a lot? Which total do you think won't come up a lot?

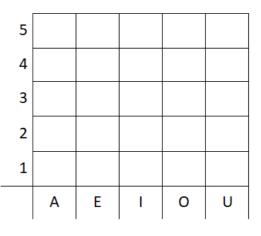

Learning outcomes:

- I can add 1, 2, 3, 4 and 5 by counting on.
- I can draw a simple pictogram.
- I am beginning to put the larger number first when adding.

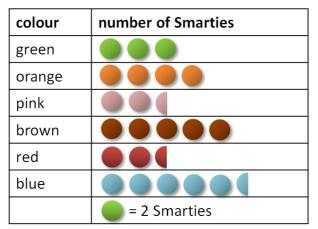

Check your understanding Questions

Draw a block graph to show the numbers of vowels (A, E, I, O, U) in this sentence: The quick brown fox easily jumped over the lazy dogs.

This pictogram was drawn to represent the number of different colours of Smarties in a big tube:

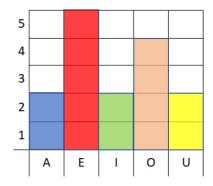

- a) How many orange Smarties are there?
- b) How many blue Smarties are there?
- c) How many more brown than pink Smarties are there?
- d) What is the difference between the numbers of green and red Smarties?
- e) How many Smarties are in the tube?

Answers on next page

Check your understanding Answers

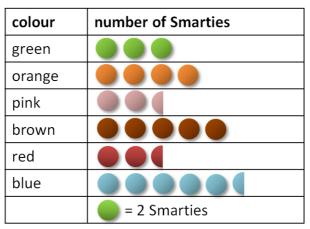

Draw a block graph to show the numbers of vowels (A, E, I, O, U) in this sentence: The quick brown fox easily jumped over the lazy dogs.

A good way to get started with this is for children to draw up a tally chart to find the total number of each vowel; suggest this if they are stuck.

They should find the following: A = 2, E = 5, I = 2, O = 4, U = 2

This pictogram was drawn to represent the number of different colours of Smarties in a big tube:

- a) How many orange Smarties are there? 8
- b) How many blue Smarties are there? 11
- c) How many more brown than pink Smarties are there? 5
- d) What is the difference between the numbers of green and red Smarties? 1
- e) How many Smarties are in the tube? 45

Answers of 4 and 5½ for a) and b) respectively suggest children have missed the information **that one circle represents 2 Smarties**.

An answer of 15 for c) suggests children have added the number of brown and pink Smarties rather than 'found the difference' which is more explicit in the wording of d).
